

Environmental Policies and Practices in the Mainland and the HKSAR

Wednesday, 9 April 2008

Theatre II, Hong Kong Convention & Exhibition Centre

ORGANIZERS

**Environmental Division
The Hong Kong Institution of Engineers**

**Association of Engineering
Professionals in Society Ltd**

Theme

Given one of the core objectives of the SAR Government is to raise Hong Kong people's quality of life and improve the environment, the HKIE Environmental Division and the Association of Engineering Professionals in Society Ltd consider there is a pressing need for the community to have an insight into not only the environmental policies and measures introduced by both the SAR Government and the Mainland Authorities but also how effective they are in response to changing circumstances. The seminar will look into the aforesaid, share the progress made in cross-boundary cooperation to combat regional pollution particularly in meeting the agreed 2010 emissions reduction targets, and analyze the causes for climate change and its likely economic, social and environmental impacts to Hong Kong and the Pearl River Delta. Other environmental issues including Air Quality Guidelines (AQG), waste management, planning & design of sustainable cities, and registration of environmental engineers and practicing requirements in the Mainland will also be examined. Senior government officials as well as environmental experts and practitioners from Hong Kong and the Mainland have been invited for sharing with us their knowledge and experience.

Organizing Committee

Chairman – Ir Dr C W TSO

Members – Ir K P YIM
Ir Dr Simon HO
Ir T Y IP

Ir C F LAM
Ir P K LEE
Ir Roger NG
