

Virtual Site Visit to Trunk Road T2 and Cha Kwo Ling Tunnel Sub-sea Tunnelling by Tunnel Boring Machines

Step to Registration:

1. Open up your web browser and navigate to '<https://trunkroadt2.jamm.hk>' and click "Advanced"

2. Click "Proceed to trunkroadt2.jamm.hk (unsafe)"

3. Click "Register" to fill in the registration form

Virtual Site Visit to Trunk Road T2 and Cha Kwo Ling Tunnel

Trunk Road T2 and Cha Kwo Ling Tunnel (The Project) forms the middle section of Route 6, connecting the Central Kowloon Route (CKR) to the west and the main tunnel of the Tseung Kwan O – Lam Tin Tunnel (TKO-LTT) to the east.

Upon commissioning of the entire Route 6, Journey time during peak hours between Tseung Kwan O Town Centre and Yau Ma Tei will be substantially reduced from about 65 minutes now to 12 minutes. The Project comprises 3.4 km of dual two-lane trunk road, 3.1 km of which is in the form of tunnels.

The tunnels will be constructed mainly by using two 14 m diameter Tunnel Boring Machines (TBM) drilling concurrently. The Merits of TBM tunnelling in this Project are to avoid disturbance to the seabed, minimize disruptions to the operation of Kwun Tong Typhoon Shelter, Kwun Tong Pier and existing coastal facilities, and allow the public to enjoy the harbourfront as usual.

4. Fill in the registration form and click "Register"
